Summary:

Software engineer with a focus on tech (IT), business and management side. Open to collaborate or work in the related areas.

Experience:

Software Developer Feb 2023 - Apr 2023

Freelance

- Created a website using WordPress that contains various web pages and used few plugins to create the website and also used Elementor in few places to create the web pages.
- It is a construction website and also made few graphics like logos.
- Selected and used the templates as per the business needs and matching the requirements of the client and manipulated the template to create a reliable and creative website.
- Created and maintained the data in the website and reviewed it to match the client's expectations and the needs.
- Worked with the Wordpress blocks and created web pages using that.

Graphic Designer Mar 2023 - Apr 2023

Freelance

- In this graphics designing project I made the logos, visiting cards, letter head and envelope designs for the client which is a construction company
- Used Canva for making these things and also completed and fulfilled the requirements of the client.
- Used various combinations and creativity for the clients business to match the idea and the business of the client.

Software Engineer Intern Feb 2022 - Aug 2022

GS Lab

- This was a full time internship for the position of Software Engineer Intern where I was working on full stack technologies like java, spring spring boot, MVC, spring security, spring data JPA, AngularJS, Angular, Kafka, html, css, JS.
- The project was made using maven and gradle libraries and used these functionalities in my project.
- I built web pages and developed both the front end and back end and connected them.
- Coded the backend in Java using OOPs concept and spring framework and merged it to frontend which was in Angular and AngularJS.
- Developed the web pages using the SDLC stages and also maintained and fixed bugs and issues through debugging and solving the problem.
- The front end mainly had technologies like Angular and Angular JS, javascript, html, css
- I used Jhipster to create the templates and work on the webpages.
- I got to learn and work in various deployments of the different versions of the website and the project.
- I created flow diagrams and documentation for the project.
- Used Spring framework while working in the back end in java to create Rest APIs to work on data and sending, receiving and performing operations on data.

PHP Development May 2021 - Jun 2021

Brainy Beams

- Made a project using technologies like PHP, JS, HTML, CSS, Laravel.
- We got assignments about making few projects and programs based on the learnings and had to create the programs

Project Dec 2020 - Jan 2021

- This project is based on react, it shows the covid cases, deaths, recovered cases and also maps. Got to much about react.js through this project.

Full Stack Development Dec 2018 - Apr 2019

Enlighten Infosystem

- This training was on the PHP development, in this training I learned PHP, MySQL, JS, HTML, CSS and made a project based on these technologies named ACTIVITY CLASH which is a fully dynamic website for managing and gathering participants and organisers and connect them
- <https://github.com/prathmesh29/activity-clash>
- Activity clash is a website containing three users such as admin, participants and organisers. In that the organisers have to upload any events anything the organiser wants to advertise and participants can participate through our website in events.

Education:

Babaria Institute of Technology, Bachelor of Engineering (B.E) in Computer Science & Engineering
Maharaja Sayajirao University Polytechnic, Diploma in Computer Engineering

Jul 2022
Jun 2019

Skills:

JavaScript

C++

Spring security

Graphic Designing

PHP

C Programming

ReactJS

SQL

Digital Marketing

Maven

Angular

Spring

Spring data jpa

Web development

MS Excel

Social Media Marketing

HTML

MS PowerPoint

Email Marketing

Gradle

AngularJS

Spring boot

Wordpress

CSS

MS Word

Search Engine Optimization

Java

C Programming

Python

jhipster
