

DIVYA KUMARI

A self-motivated and hardworking hustler, looking for an opportunity to begin my career and expand my learnings, knowledge, and skills in a professional environment.

PROJECTS

Redonate

Blood donation and emergency Webapp: Utilizes Docker (Docker4Drupal) and Drupal. Connects patients in accident and emergency cases with registered blood banks, donors, and hospitals. I used Mailhog for sending mail.

Health Management System

This project aims to develop a health-related business application using HTML, CSS, Bootstrap for the user interface, PHP for server-side scripting, and JavaScript for client-side scripting. The application will facilitate critical decision-making, introduce health solutions, and implement effective business tactics.

Portfolio — [Demo](#)

I created this project for my personal portfolio website. In this project, I made some animation with Javascript. It is a responsive website.
