PROFILE

As a skilled React developer with a strong background in JavaScript, HTML, CSS and Bootstrap. I am passionate about creating engaging and user-friendly Mobile and web applications. With hands-on experience in building projects using React, I possess a deep understanding of the React library and its components.

SKILLS

Front-end

React.JS, React Native Redux, Rest API, JavaScript, ECMAScript, HTML, CSS, Bootstrap

Tools

Git, Github, VS Code

PROJECTS

KYC Module:

- This Module was generally designed to identify about our customer before investment in our application.
- In KYC Module I've designed various pages using React JS, JavaScript, HTML, CSS and Bootstrap.
- In this Module I've used third party Digilocker API to verify user credential by generating OTP.
- I have also implemented reducer to store page information ensuring it can be accessed whenever needed.
- I've used various hooks of react like useState, useEffect, useRef.

NPS Module

- NPS module was designed for long-term money investment, focusing on retirement planning to ensure the security of our future.
- In this module user are allowed for two type of money investment individual and corporate. but user can invest only if their KYC has been already done else they have to complete KYC first.
- For implementing this feature I've used technology like React JS, JavaScript, HTML, CSS and Bootstrap.

E-commerce website

An E-commerce website that allows customers to browse and purchase products. The website features a user-friendly interface, and advanced search and filtering options Customers can create accounts, add items to Cart and Wish list.

- This project was implemented using the React JS with a REST API.
- Handles State Management with Redux.
- Used NPM packages such as react-router-dom, Axios.
- Used Axios and its functionalities to send and receive data between frontend and backend.
- Built majority of the functionalities of an ecommerce platform such as product view, cart, Wishlist.
