PROJECTS

Real estate(Homesky) (08/2022 - 10/2022)

- In this project, I will build a location-based real estate website. It is going to be a full stack web application with Nodejs powering the backend and React Js the frontend , with sever side through JSP.

Online Gym enquiry system (04/2022 - 05/2022)

- The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the Gym, Trainer, Time Slot, Memeber. It tracks all the details about the Memeber, Facility, Fitness Class with frontend - HTML,CSS, Javascript. framework - Reactjs, Database-Mysql.

Android Weather Application (02/2023 - 04/2023)

- In this project, I have build a weather application. This application will show the temperature of a location. To fetch weather information I can use the Weatherbit **API**. In this project, i can build an app that will find the device's location coordinates via (longitude and latitude) or by search an location.
