### SUMMARY

Software Professional with 1 year of Experience as a Reactjs developer with agile development methodologies. I'm actively seeking a full-time position as a Software Developer, and Software Engineer in a reputed Organization.

### EDUCATION

#### vaagdevi college of Engineering

Bachelor of Technology

2021 | Warangal, India

### SKILLS

**Client-side-Technologies** (Reactjs, Redux, Javascript ,Bootstrap, Tailwindcss, Html,Css)

**Server-Side-Technologies** (javascript, node js, express.js, MySQL)

### PROFESSIONAL EXPERIENCE

#### Sunshine Creative Labs

Reactjs Developer

2022 – present | hyderabad, India

Sunshine Creative Labs is a Software company Development across Web, Mobile, and Social-Media integrations

- Developed a responsive website UI using Reactjs, and used some libraries like redux
- Enhanced the usability of existing applications by applying the latest accessibility standards and best practices
- Collaborated with project managers to successfully deliver projects on time, increasing organizational efficiency

### PROJECTS

#### Restaurant Application -Reactjs

2023 – 2023

- We have developed a responsive restaurant application using React.js, and CSS framework Bootstrap.
- It enabled user interactions for adding, removing, and customizing items, enhancing the overall user experience.
- Applied CSS and styling frameworks to create a visually appealing and consistent design throughout the application.
- We have implemented data fetching using React's use effect and use state hooks to interact with backend APIs.
- Conducted unit testing for critical components, ensuring the reliability and stability of the application.
- Successfully deployed the restaurant application to a hosting platform for public accessibility.

#### ReactJS To-Do List

Project Title: ReactJS To-Do List

- Component-Based-Structure: Utilized React components to break down the UI into modular and reusable pieces, promoting code reusability and maintainability.
- State Management: Employed React's state management to dynamically update and render the UI based on user interactions, ensuring a smooth and responsive user experience
- Technologies Used:

ReactJS

JSX

CSS for styling

Redux
