

I am an ambitious and hardworking developer seeking an opportunity to work in a challenging environment to prove my skills and utilize my knowledge in the growth of the organization. I have 2.5+ years of experience in the Information Technology and Service Industry.

## WORK EXPERIENCE

### Solution Engineer

Deqode Solutions

09/2021 - Present

Pune, india

- Worked on using ReactJS and Redux for building rich internet applications.
- Took responsibility for leading the project and worked on white-labeling the website which required segregating the web app into four modules
- Demonstrated a strong commitment to writing clean, readable, and maintainable code by adhering to established coding standards and best practices
- Created Typescript reusable components and devices using a component-based architecture.
- Expertise in debugging and troubleshooting existing codebase.

### Software Engineer

Digikull

01/2021 - 09/2021

Remote

- Designed web pages with responsive UI. Implemented client-side interface using ReactJS.
- Converted wire-frame and designed into high-quality code. Created APIs by using the Django REST framework on REST Architecture.
- Implemented lazy loading which reduces the loading time by 400ms
- Worked on react js component to build blog application connectivity with backend node js
- Implemented login with Google and configured API to post login data toward the backend. Worked on SEO (Search Engine Optimization) for next js application
- Implemented Redux in the frontend to store the logged-in user details and preferences.
