## SKILLS

MongoDB	Experienced	Expressjs	Experienced
JavaScript	Experienced	Async/await	Experienced
Nodejs	Experienced	API design and development	Experienced

## INTERNSHIPS

Oct 2021 — Dec 2021	Intern, AI/ML (Python), Take it Smart Bengaluru Project: Ball tracking system Designed and implemented a ball trajectory tracking project using the Hawk-Eye technique with six strategically placed cameras. Applied Python programming skills to optimize the tracking algorithm, contributing to the improvement of sports-related tracking systems.	Bengaluru
---------------------	---	-----------

## CERTIFICATIONS

Aug 2023 — Nov 2023	Backend Development(Node.js, MongoDB)	Airtribe Institute Bengaluru
---------------------	---------------------------------------	---------------------------------

### Capstone project: Job scheduler system

#### Job Submission:

Implemented a mechanism allowing users to submit jobs for immediate or future execution. Supported various job types and complexities.

#### Recurring Jobs:

Developed the system to handle recurring jobs at specified intervals (hourly, daily, weekly, or monthly).

#### Job Management:

Created RESTful APIs for users to manage their jobs. Provided functionality to view job statuses, cancel jobs, and reschedule jobs.

#### Failure Handling:

Designed a mechanism to handle job failures with an automatic retry system. - Implemented user notifications for consistently failing jobs.

Logging and Monitoring: -Established a detailed logging system for all job executions. Implemented a monitoring system to track job statuses and ensure overall system health.
