-

My projects

Food Delivery Mobile app

- Utilized React Native for cross-platform app development.
- Integrated Firebase for real-time data storage and retrieval.
- Implemented user authentication, allowing secure sign-up and sign-in functionality.
- Designed and developed distinct sections for both vegetarian and non-vegetarian menus.
- Engineered a robust shopping cart system, enabling users to add and manage their orders.
- Project Source code :- [Moinkhank/codeStepByStep: This is React Native mobile app of Food Delievery \(github.com\)](https://github.com/Moinkhank/codeStepByStep:ThisisReactNativeMobileAppofFoodDelivery)
- Project Video Link :- [\(99\) my food app project - YouTube](https://www.youtube.com/watch?v=99myfoodappproject)

Youtube Clone.

- Developed a YouTube clone with expanded functionality, featuring Home, Like, Dislike, Trending, and Library tabs.
- Utilized Tailwind CSS for responsive and dynamic web application design,
- Integrated external APIs for data retrieval and display, enriching the application with real-time content.
- Employed Redux for streamlined data management, enhancing performance and user interaction.
