## **Objective:**

Dynamic and results-driven iOS Developer with a strong background in designing and building applications for the iOS platform. Adept at ensuring the performance, quality, and responsiveness of applications. Seeking a challenging role to contribute technical expertise and collaborate with a dynamic team to deliver innovative iOS solutions.

## **Skills:**

- - Design and build applications for the iOS platform, ensuring high performance and responsiveness.
- - Collaborate with a cross-functional team to define, design, and implement new features.
- - Implement offline storage, threading, and performance tuning for optimal application functionality.
- - Integrate RESTful APIs to connect iOS applications to back-end services.
- - Ensure adherence to UI/UX standards and leverage knowledge of other web technologies.
- - Uphold Apple's design principles and interface guidelines in application development.
- - Programming Languages: Objective-C, java
- - iOS Frameworks: Core Data, Core Animation
- - Application Design: UI/UX Standards
- - Performance Optimization: Threading, Offline Storage
- - Integration: RESTful APIs
- - Collaboration: Team-oriented approach

## **Education:**

- MCA - Master of Computer Application  
Acharya Nagarjuna University, July 2020 – August 2022  
CGPA – 68.0
- BCA - Bachelor of Computer Application  
Vignan University, March 2017 – September 2020  
CGPA – 73.0

## **Certifications**

- - Java Full Stack

## **Declaration**

I declare that all information provided is true and accurate to the best of my knowledge.
