PROJECTS

EMBEDDED SYSTEM BASED AUTOMATIC METAL AND BODY TEMPERATURE DETECTION

1. It is to monitor the human body temperature when they pass through the system. If it senses any high temperature the system automatically rejects the entry of the person and warns when the temperature of the person is high.
2. It is to detect the metal near by the sensor. Whenever the metal is brought near the sensor a buzzer sound is produced.
3. It will detect the presence of hands using sensor to activate the motor pump to dispense the sanitizer.
