About Me

One crucial skill for a UI/UX designer is empathy. With 1 year and six months of experience in the field of UX/UI design, I am confident that I have the skills and experience necessary to excel in this role. Currently, I am doing my master's study in Master of Science in Information Technology at Bhagavan Mahavir University.

As a UI/UX Designer, i will be responsible for creating visually appealing, intuitive, and engaging user interfaces and experiences for websites, mobile applications, and other digital products.

Professional Experience

KMSOFT| UI/UX designer
September 2021 – Present

Key responsibilities:

Designing user interfaces: Create intuitive and engaging user interfaces that meet the needs of your target audience, using your knowledge of UX design principles and best practices.

Conducting user research: Conduct user research to identify user needs and gather insights that inform your design decisions.

Creating wireframes and prototypes: Create wireframes and prototypes to test and refine your designs, and to ensure that they align with user's need and expectations.

Collaborating with cross-functional teams: Work closely with developers, product managers and other designers to ensure that your designs meet technical requirements and align with business objectives.

Conducting usability testing: Conduct usability testing to validate your designs and identify areas for improvement.

Developing and maintaining design systems: Develop and maintain design systems, style guides, and design patterns to ensure consistency and efficiency in design.

Staying up-to-date with industry trends: Stay up-to-date with the latest UX design trends, tools and best practices and apply this knowledge to improve your designs.
