PERSONAL PROJECTS

Customer Segmentation of different product(Final Year College Project) (07/2022 - 08/2022)

- Customer segmentation involves **implementing data science methods to divide the customer base into smaller groups based on certain characteristics**. It assists marketing managers in better understanding their customers' preferences and presenting them with better-targeted advertisements.
- Tools Used: Pycharm, Python Libraries etc.

Todo List(Personal Mini Project) (04/2022 - 05/2022)

- I have built a Todo List app. In this app, users can create todo list where they can add lists of tasks. The task created by users stored in the database.
- Built todo list with the help of HTML, CSS, JavaScript, Nodejs and MongoDB.
- I have built screens for a Music player.
