

ALMAS SAIYED

Software Developer

almasworks247@gmail.com | (+91) 7383929224 | 825 Islam Street, Baleshwar, Surat

EDUCATION

- ❖ **Post Graduation in Cybersecurity** 2022 - 2023
St. Lawrence College, Kingston, Canada CGPA: 9.6
- ❖ **Bachelor Of Computer Application** 2018 - 2021
Dollyben Desai Institute of Computer, Palsana, Surat CGPA:8.15

TECHNICAL SKILLS

- ❖ **Languages:** C/C++, C#, HTML, CSS, PHP, Java, JavaScript, NodeJs
- ❖ **Frameworks:** ReactJs, ExpressJs, Bootstrap, jQuery
- ❖ **Databases:** MongoDB, MySQL, MS SQL Server
- ❖ **Cybersecurity Tools:** Wireshark, Splunk, Metasploit, Burp Suit, Nmap
- ❖ **Hard Skills:** Penetration Testing, Vulnerability Assessment, Network Security, Incident Response, Intrusion Detection and Prevention, Cryptography

PERSONAL PROJECTS

AK Cooling System

- ❖ AK Cooling System is a complete set of policies aimed at improving customer relationships in any organization. AK Cooling System is based on Customer Relationship Management. CRM software is an online application for helping business with systemic and improved customer service.
- ❖ The AK Cooling System ASP Project refers to all the interaction between business organization and customers. This web application can be used to build strong relationships with customers by providing them with better service. This is a web-based project implemented in Asp.net (C#). For database we have used SQL server.

Smart Photo Selection

- ❖ Smart Photo Selection revolutionizes the client experience by enabling them to choose their desired images remotely, eliminating the need for physical visits to the photographer's studio.
- ❖ This platform provides photographers with significant advantages, eliminating the requirement to purchase storage devices such as Pendrives or Hard Disks for delivering photos to clients. Leveraging the power of Laravel and MS SQL Server, this project enhances efficiency and convenience in the photo selection and delivery process.

UBER Data Breach – Solution Implementation

- ❖ The recent Uber breach resulted from a "social engineering" attack, leveraging psychological manipulation to gain access to private data. To mitigate such risks, our IT team will provide regular training with bi-monthly assessments.
- ❖ Additionally, addressing MFA fatigue, we propose an annual subscription of \$400,000 for enhanced MFA features. To bolster security, a Privilege Escalation Alerts and Monitoring System, costing \$400,000, will be included in the next budget year as a proactive measure against potential breaches.

WORK EXPERIENCE

Software Developer Intern Laskin Infotech.

Bardoli, India

- ❖ Followed agile methodology in developing the application.
- ❖ Developed web services for administrative services, Configuration services and pricing services.
- ❖ Worked on database modeling and database schemas and created stored procedures in SQL Server 2008.
- ❖ Designed and developed user interfaces ASP.NET on Visual Studio 2008.
- ❖ Worked on generic classes using C# to create Support Functions and Database Operations.
- ❖ Implemented OOPS concepts like Inheritance to develop Base common and Base Secure modules.
- ❖ Used ADO.NET for retrieving the data from the database to perform necessary operation on the page load event.
- ❖ Used SQL Server 2008 database for the functionality of the application in storing and retrieving the data.
