PROJECTS

1. Study And Simulation of Multilevel Inverter

The objective of this project is to implement a 13 level multilevel inverter to reduce THD value upto 2.65% by using single DC source. By increasing the levels of inverter the harmonics are reducing and quality of waveform is increasing.

2. Rain Detection Alarm

The objective of this project is to prevent the materials from rain. These are special types of wipers that turn on automatically when it begins to rain and turn off when the rain stops
