Kamaraj matriculation higher secondary school 2014
10th % - 80.00

💡 PROJECTS

HOTEL ROOM BOOKING MANAGEMENT SYSTEM

Platform : Android Programming, React JS, MySQL

Description : Hotel Room Booking System is user friendly software application designed for both customers and hotel administrators, offering a range of functionalities to simplify the reservation process like Customers can search for available rooms, view room details and make bookings. On the other hand, hotel administrators can manage reservations and generate reports. It aims to streamline the booking process, enhance customer satisfaction and optimize the overall efficiency of hotel operations.
