PROJECTS

Target Detection and Tracking through HD videos

(Duration August 2022 - December 2022)

- An autonomous navigation by a military tank towards its target such as another military tank or vehicles, based on detection, locking-on and following the movements of the target is a much sought after application.
- Skills used - Neural Networks, Deep Learning and IOT.

Video Meet

(Duration January 2023 - April 2023)

- Video meet app using Node.js, Socket.io, and WebRTC. It allows users to have real-time video calls directly in their web browsers.
- Node.js served as the backend, React js is frontend ,Socket.io handled real-time communication, and WebRTC enabled peer-to-peer video and audio streaming.
- This app featured a user-friendly interface for joining calls, muting/unmuting audio, and enabling/disabling video.
