## ACADEMIC PROJECTS

### Title: “Bird repellent in a grape yard using raspberry pi”

As you know that farmers are facing problems in grape yard, birds are the main reason, to avoid this problem we had built an project which do not harm any birds enter in the field but it make irritating sound to fly away and farmer can easily get to know what is happening in the farm video will be sent to him automatically now he is free from such things.

**This project has been selected for Karnataka state council for science and technology (KSCST) project.**

### Title : “Rental Vehicle Parking System”

The Rental Parking System is an application designed to manage and optimize the rental of parking spaces in a specific area. The system aims to provide a seamless and efficient solution for both parking space owners and potential renters. It can be implemented as a web-based or mobile application, offering a user-friendly interface and necessary features to facilitate the parking rental process.
