## SUMMARY

Solution-driven web developer adept at contributing to highly collaborative work environment and finding solutions. Proven experience developing consumer-focused websites using HTML, CSS, JavaScript and React. Good knowledge of the best practices for web design, user experience, and speed

## EXPERIENCE

### Frontend Web-Developer

#### Alite Projects

02/2023 - 10/2023 Vadodara, Gujarat

- During my internship, I honed my JavaScript expertise with libraries such as ReactJS and MeteorJS, alongside proficiently crafting UIs using HTML and CSS, and working on frameworks such as Bootstrap, MaterialUI, Tailwind, and DaisyUi. My experience extended to project management tools like Git and GitLab, reinforcing my commitment to efficient code collaboration. Moreover, I excelled in client communication, delivering compelling demos for tailored proof-of-concept projects as per the requirement of the project and client. This journey emphasized vital skills, including teamwork, time management, communication, and critical thinking.
- Projects**
- Worked on making a Proof-Of-Concept Social Media dashboard webapp for social media influencers, in the project I created login and sign-up pages using facebook and google. Later learnt how meta graph api's work and how to get user data after sign-up using the api's. also worked on making the UI for demo using Tailwind and DaisyUI. Then using The input date given by the user show them possible Optimal Posting Timings in the future and various other data using Meta graph api. • Also worked on solving bugs and design changes in a E commerce store project made custom styled components using Material-UI to show data such as product categories, number of items, by calling api's in redux store. Also used theming to change Container width as per figma and make it responsive.

### Professional Training Course

#### Weltec Institute

07/2022 - 01/2023 Vadodara, Gujarat

- At the institute i learnt web-Development in deep, Acquired knowledge about languages and technologies like HTML, CSS, JavaScript, JQuery, React.js by learning their basics and making real time projects.
- Projects**
- I independently developed a E-commerce store using the Fake Store API available online, leveraging ReactJS for the frontend. designed UI using the Tailwind and DaisyUI frameworks. The store featured key components such as a secure login page, product listing page, and detailed product pages accessible upon clicking any product. To facilitate a seamless shopping experience, I implemented an 'Add to Cart' functionality using React Redux, allowing for real-time updates of item quantities and prices. For seamless API integration, I utilized Axios, and I managed application routing with React Router DOM, ensuring smooth Navigation using React-Router-Dom.

## SKILLS

JavaScript ReactJS HTML CSS Axios Bootstrap Tailwind GrapIQI, JQuery Git

## EDUCATION

Bachelor Computer Engineering (8.60 CGPA)

Babaria Institute Of Technology(G.T.U)

06/2018 - 07/2022

## LANGUAGES

Hindi  
Native

Englis  
Proficient

Gujarati  
Proficient
