## PROJECTS

---

### Hospital Management System

J Spider • <https://github.com/manishjoshidev/HospitalManagementSystem> • October 2022 – December 2023

It automates tasks such as patient registration, appointment scheduling, medical records management, and billing. Java and Spring Boot provide a robust framework, while MySQL ensures secure data storage and REST API facilitates interoperability and communication with other systems.

### Quiz Application

J Spider • <https://github.com/manishjoshidev/QuizApplicationinSpringBoot> • March 2023 – May 2023

• Developed Quiz Application, a web application using Spring Boot and PostgreSQL, to showcase proficiency in full stack development. Designed and implemented the front-end using HTML, CSS, and JavaScript. Utilized Spring Boot to develop RESTful APIs, ensuring efficient communication with the PostgreSQL database. Employed Git for version control and deployed the application to Heroku for scalability.

• Proficiently utilized Spring Boot to design and implement RESTful APIs, optimizing communication with the PostgreSQL database. Achieved a 20% reduction in API response times, contributing to overall project success and significantly improving system efficiency. Employed Git for version control and deployed the application to Heroku for scalability.
