SUMMARY

To secure a challenging position within an organization that not only offers opportunities for enhancing my skills and knowledge but also facilities personal and professional growth aligned with the company's objectives.

SKILLS

- | | |
|-------------|-----------|
| • DotNet | * Asp.Net |
| • Ado.Net | * MVC. |
| • Aws Cloud | * SQL |
| • DBMS | *Python |
| • Html5 | * CSS |
| • MS-Excel | * MS-Word |

EDUCATION

- | | |
|---|----------------------|
| ❖ Information Technology Lakshmi Narain College of Technology Bhopal MP | CGPA: 9.08 2023 |
| ❖ XII (CBSE) Gyan Ganga Int. Academy Bhopal MP | 68 Percentage 2019 |
| ❖ XII (CBSE) Gurukul The English Medium School Bareilly MP | CGPA: 8.4 2017 |

EXPERIENCE

- ❖ **AWS Cloud Virtual InterShip | AWS Academy**
 - I've completed my internship successfully, where I had numerous opportunities to acquire valuable skills and become a well-prepared professional for the industry. Set up and configured cloud-based infrastructure using AWS services such as EC2, S3, RDS, and VPC, supporting the development and deployment of cloud-based applications.
- ❖ **Cyber Security Virtual InterShip Program | CISCO**
 - As an Intern, I was given a self learning modules covering networking fundamentals and essential cybersecurity concepts. I proposed and implemented a strategy that effectively isolated critical systems, reducing the attack surface and enhancing overall security posture. Gained hands-on experience in real-time threat detection, root cause analysis and including troubleshooting.

ACADEMIC PROJECTS

- ❖ **Auto Scaling Group and Load Balancer of Aws EC2 Instance**
 - Spearheaded the seamless integration of Auto Scaling Groups, resulting in a 40% increase in application availability and a 20% decreasing in server costs.
 - Implemented a dynamic approach that optimized resource allocation, resulting in a 20% shortening in infrastructure costs and improved scalability to handle peak workloads efficiently
- ❖ **LNCTian HUNGRY – Food Ordering Website**
 - Aimed to streamline the food ordering process for college staff by creating a user-friendly website.
 - This platform allowed staff member to conveniently place food order from their respective departments, cut down waiting time and improve overall efficiency.
 - Implemented the payment gateway and also use role base management login system.
