Seeking a position as an Entry Level Full Stack Developer where I can leverage my expertise in developing database schema and objects, creating REST APIs for third party integrations, and optimizing product development by creating unit tests to make can ensure quality development and support processes. a positive and meaningful impact. With my knowledge of relational database systems, technical documentation creation, and troubleshooting experiences I am confident I can ensure quality development and support processes.

INTERNSHIPS

- **Black Coffer | Java Development Intern 2023**
Created beautiful dashboard (using HTML & CSS), for getting the resource used Servlet API used Java programming language (hibernate) to deal with the data inside the given Data.csv file.
- **True Technology | Java Developer intern 2023**
Developed a full-stack web application using Java, Spring MVC. Implemented user authentications & shopping cart functionality. Utilized Restful APIs to interact with the backend and manage user data.

SKILLS

- Work experience with java, PL/SQL, SQL, html5, css3, Java-script
- Familiarity with this databases Oracle, MySQL
- Knowledge of multiple FRAMEWORKS like spring, spring boot, Hibernate
- Good understanding in REST API designs, JDBC
- Hands on Experience on Eclipse IDE, SQL plus, MySQL, Postman, VS Code.
- Experienced with the Agile development methodology.

EDUCATION

- Master of Computer Applications | BPUT, Bhubaneswar | 2022
- Bachelor of Computer Applications | BUPT, Berhampur | 2020
- Council of Higher Secondary Education | SSJSC, Berhampur | 2017
- Board of Secondary Education | OSGTR, State Board | 2015

PROJECT

- **Application of ML algorithm for finding loan defaulters using ml | 2022**
This project is for the rider community to plan and book their ride. In home page there are some icons like home, rent, places, schedule which will provide functionalities like User authentication, share other's bike, can view places with description with attached Google map & can also book foods.
- **Ecommerce Web Application using Spring Boot | 2023**
Created a Web Application where user can enter the details. And it will be stored in database using Postman where it's is a platform, where the Customer will add the Products into the cart and order the product. And also doing the CRUD operation.

- **Employee Management System | 2023**

Create a program to manage employee information, including features like adding new employees, updating records, and generating reports. Technologies that are used for dynamic webpage (HTML, CSS, and JSP), Dynamic resource (Servlet) & backend operations using JDBC.

CERTIFICATIONS

- Certified with Java Full-Stack Development from j-spiders, Bangalore (2022-present)
- Certified with Oracle SQL & PLSQL from Elegant IT Services, Bangalore (2019-2020) • Chat-GPT for beginners from Great Learning

COURSES

✓

Java Full- Stack Development

- Understood the fundamentals of web development and the client - server architecture.
- Created responsive and interactive frontend interfaces using HTML, CSS, and Java Script.
- Built backend applications with popular frameworks I like hibernate.
- Developed robust backend systems using Java and Spring Boot.
- Implemented Restful APIs for communication between frontend and backend components.
- Designed and manage relational databases using SQL and JDBC.
- Handled user authentication and authorization securely.
- Utilized version control systems such as GIT for collaborative development.
- Troubleshoot and debug web applications effectively.
- Follow best practices for code quality, security, and performance.
- Learnt some of the core concepts like Multi -Threading, Exception- Handling, REGEX. • Learn Collection framework with its utility methods.

✓

Chat- GPT for beginners

- Curriculum Development, Coding prompts, suggestions, Summarization prompts, Email prompts, Content prompts, Report prompts, marketing prompts for Chat GPT.
- Keyword generation, text generation based on keyword, Script writing.
- Limitations of Chat GPT.
