WORK EXPERIENCE

Tech Associate - iOS & React Native Developer

Alpha ICT LLP

09/2022 - 11/2023

Role and Responsibility

- Developed and maintained iOS and React Native applications, ensuring they met design specifications and delivered a seamless user experience.
- Collaborated closely with UI/UX designers and backend developers to implement complex features and integrate RESTful APIs.
- Successfully resolved bugs and improved the performance of existing mobile applications through code refactoring and optimization.
- Assisted in the integration of third-party libraries and services, such as Firebase and Redux, to enhance app functionality.

EDUCATION

MCA

Akole taluka education society technical campus, Akole.

2022 - Present

BCA

Sangamner college, Sangamner.

2019 - 2022

HSC

Sahyadri jr. College, Sangamner.

2018 - 2019

SSC

Bhairavnaath High School,dolasane.

2016 - 2017

SKILLS

Swift React Native Redux Basic Flutter

Dart Android MVC/MVVM APIs

Core Data AsyncStorage React Native Hooks

StoryBoards App Architecture Java Agile

Xcode MacOS Windows

PROJECTS

TODO Application

- Create a To-Do List App that allows users to manage their tasks and stay organized.
- Users can add, edit, and delete tasks, set due dates, and mark tasks as completed. The app should provide a clean and user-friendly interface, and it can also include features like prioritizing tasks, categorizing them, and setting reminders.
- This project will help you practice core iOS development skills, including working with table views, user interface design, and data persistence with Core Data or UserDefaults.
- Technology use: Swift Xcode, UIKit ,Core Data ,UserDefaults

Weather App

- Developed a Weather App in React Native, integrating real-time weather data through APIs.
- Utilized AsyncStorage for personalized user settings and created a responsive UI for seamless cross-device functionality.
- Employed React Native Hooks for efficient state management, ensuring a smooth and intuitive user experience.
- The app features automatic location detection, weather icons, temperature unit conversion, and robust error handling, providing reliable weather information.
- Technology use:React Native,RESTful APIs,AsyncStorage,Responsive UI design,React Native Hooks
