## Project:

## ONLINE EMPLOYEE LEAVE MANAGEMENT SYSTEM.

### Project description:

- I have created a **PHP Project** entitled **Online Employee Leave Management System**. This PHP project Provides the company's management and employees an online platform to manage the level applications. The applications in mobile-responsive which is helpful nowadays because most of the employees owning a personal mobile smartphone.
- Using this system, the employees can easily apply for leave even not present in the office. Also, management can easily track the employee's leave records annually and this application has a feature that prevents the employee to apply if they already

consumed their leave credits. Each employee's leave privileges and credits individually. The employee's leave credits are automatically reset annually. The online application also generates a printable date-wise report for leave applications.
