HTML,CSS,MySQL,DBMS,JavaScript,Code Ignitor

Male V.I.K.A.S Co-operative Society

- The Male Progressive Co-operative Society Website system has been developed to override the problems prevailing in the practicing manual system.
- Website is designed for the particular need of the Progressive Co-operative Society to carry out operations in smooth and effective manner.
- It is user friendly Online Cooperative Society Website, it can assist the User to access Services of society and records conveniently. Thus it will help organization in better utilization on resources which will be accessible on a single click.

Third Year Project

Java, MySQL

Library Management System

- This system helps us to manage all the functions of library. It helps to librarian to maintain the database of new books and the books that are borrowed by members along with their due dates.
- This project is developed in Java programing language and MySQL database is used. With a library management system, librarians can easily search and retrieve information about books, as well as track which books have been checked out and by whom.
