Projects:

Title: Hospital Management System

Description: During my training period, I spearheaded the development of an Hospital

Management System utilizing Java and Spring frameworks. I led the design and implementation of user registration, authentication, doctor status search, and doctor appointment booking functionalities. Additionally, I integrated PDF generation and email delivery systems (Java Mail API). This project honed my technical expertise and problem-solving skills, demonstrating my proficiency in Java and Spring frameworks.

Technologies Used: java, database management system, spring frameworks

Title: Heart beat monitoring using Arduino.

Description: The main aim of this project is used to measure the heart beat accurately by using Heart beat sensor.

Technologies used: Embedded Technologies.

Advantages: 1. Low cost

2. Show accurate result.

3. Highly durable.

It is a group project of 4 members, and I am the team lead.

Internship:

5 months of internship in Mindwave Infotech on the technologies of

1. Mainframes.

2. Java Full Stack.

3. Software Testing.
