SKILLS

Programming Languages:

Intermediate:

• Java • Python • JavaScript • MATLAB

Basic:

• C

Tools and Frameworks:

• Figma • React JS • React Native with Expo

Technologies :

• HTML • CSS • SQL • Arduino (basic)

Event Management:

• Event Planning • Problem-Solving
• Project Management
• Team Leadership

KEY ROLES:

Class Representative:

Improved student-faculty communication. Proposed positive changes and organized class events.

Student Placement Coordinator:

Coordinated placements and supported career development. Provided career guidance and increased placement rates.

Organizer, AICTE Idea Lab:

Led innovation workshops and managed logistics. Promoted creativity and entrepreneurship.

Tech Lead, IETE Student Forum:

Led tech workshops and implemented projects. Encouraged knowledge sharing among team members.

ACHIEVEMENTS

- Proficiently addressed over 100+ **LeetCode** challenges, spanning a diverse range of concepts, thereby showcasing my robust problem-solving aptitude.
- Received strong **Letter of Recommendation** from Let's Grow More for outstanding performance in a web development internship during B.Tech's third year.
- Position 1 in Circuit Hunt, organized by ISTE Student Forum SVEC, demonstrating technical prowess and problem-solving abilities in competitive electronics and circuit design challenges.

PROJECTS

DAILY QUOTE APP | REACT NATIVE

The 'Daily Quote' app, built using React Native and Expo, delivers daily inspirational quotes from an API. It boasts a user-friendly interface, lets users save their favorite quotes, and easily share them via WhatsApp. The app offers a colorful and interactive experience, ensuring that users start their day on a positive note.

FIRE SHIP (A CANVAS GAME) | JAVA SCRIPT

"Fire Ship" is a single-player game developed in JavaScript, utilizing HTML5 Canvas for rendering. Players control a spaceship, aiming to score 100 points within 50 seconds by shooting down approaching enemy ships. The game features vertical movement, infinite scrolling space, and limited bullets that reload at a rate of 3 bullets per second.

PET RESQ | FIGMA

Designed the 'Pet ResQ' Figma app with a vibrant interface for users to report stray animals, facilitating their adoption through a community-driven platform. The app, thoughtfully crafted with rich features for both administrators and users, offers a user-friendly and visually appealing experience, serving as a bridge between animals in need and caring community members.

INTERNSHIPS

JAVA DEVELOPMENT | TECHNOHACKS

September 1 - September 30, 2023

Developed Java programming skills during the internship, with a focus on creating efficient and scalable software solutions, contributing to the development of robust and high-performance applications.

WEB DEVELOPMENT | LETS GROW MORE

November 1 - December 1, 2022

Cultivated web development expertise during the internship, focusing on HTML, CSS, and JavaScript, contributing to the creation of interactive and responsive web solutions.

SOCIAL MEDIA MARKETING | SAAS GURU

May 2 - July 2, 2022

For successfully completing 8-week internship in Campus Ambassador Program with excellent performance.
