SKILLS

- Html
- Css
- Javascript
- Php
- Java

PROJECTS

- **Markdown-blog website using nodejs and mongodb**
 - Developed a full-stack Markdown blog website using Node.js, mongodb, Express, and EJS templating engine.
 - Implemented functionality to allow users create, edit, and delete blog posts.
 - Utilized Bootstrap for responsive and visually appealing user interfaces.
 - Integrated a Markdown editor for users to write and format their blog content.
- **Realtime chat system using nodejs and socket.io**
 - Developed a real-time chat application using Node.js, Express, and Socket.IO.
 - Utilized Socket.IO for WebSocket communication, enabling instant and bidirectional communication between clients and the server.
 - Employed event-driven architecture to handle various chat events, such as user joining and sending messages.
- **Todo list using php and MySQL**
 - Developed using PHP with PDO for database access.
 - Front-end design enhanced with Bootstrap for a responsive and visually pleasing interface.
 - Users can easily add, view, update, and delete tasks.

COURSES

- **Responsive web design course from freecodecamp**
 - Earned a certificate in Responsive Web Design from FreeCodeCamp, demonstrating user-friendly web interfaces.
 - Completed a comprehensive curriculum covering HTML and CSS fundamentals, including best practices for structuring content and styling layouts.
