PROJECT:

Name: Employee Management System. (Internship Project)

Description: We have developed this project Employee Management System on C#, ADO.Net and MSSQL. The main objective for developing this project was to create an Employee Management System to manage employee details in an organization. This project provides a lot of features to manage the employee in very well manner. This application has a good appearance and is very easy to operate. It is very simple and easy to access at C#. It is a very simple source code. It saves our time and money. It can help for keep to track of employee salary records . This project contains a lot of advance modules which makes the back end system very powerful.

Developed using: ADO.NET, MSSQL .

Name: Institute Management System

Description:

- Developed an Institute management system for enhancing the maintenance of institute details.
- Implemented using ASP.Net MSSQL, Entity Framework and MVC.
- Increased security by adding an additional layer of verification i.e the login process.
- Built the system within the timeframe of October 2023 to November 2023.
