ProjectDetails

Event Management System

- ✧ The aim of developing "To Manage Event " .
- ✧ Event management system is a process of organizing a professional and focused event, for a particular target audience.
- ✧ The project is basically targeted at those people who would like to plan Events and have an Internet access.

Employee Expense Management System

- ✧ In an employee expense system, expenses are typically organized by employee and date, with details such as the amount, purpose, and category of expense. Managers can view this information in real-time and filter expenses by various criteria, such as department or project.
 - ✧ If an employee submits an expense report through an online employee expense system, and a manager raises a dispute or issue with the report, the process for resolving the dispute will depend on the specific policies and procedures of the company and the expense system being used.
-
