## 🧩 INTERNSHIP-PROJECT

### Rishabh Software

Meal Booking System

The Employee Meal Booking System is a web-based admin tool streamlining meal booking management. It offers secure login, user registration, and a visual calendar for efficient oversight. Key features include detailed employee and non-employee booking management, advanced filtering, and the ability to add new bookings. The system enhances security with a confirmation-based logout. It optimizes administrative processes, fostering efficiency and organization.

### Spectra Computer(S.K.Infosoft)

Indian Farmer Application

Platform: PHP, Android

Project Description: In the project farmer can interact with all wholesaler to sales its all kind of the product with his choice of amount not only can this but farmer interact with the different types of storage owner to store its product. We have develop this product which help the farmer to get the actual price of its grain
