SKILLS

- Programming Languages: C, C++
- Front-End Development: HTML, CSS, JavaScript, React
- Operating Systems: Windows
- Data Structures & Algorithm
- Object Oriented Programming

PROJECTS

WEATHER APPLICATION | Github | Demo

HTML, CSS, JAVASCRIPT

- The application is built using HTML, CSS, and JavaScript that uses openweather API to display current weather conditions for a specified location.
- The application is designed to request the user's permission to access their current location and then display the current weather for that location in a user-friendly format.
- If the user declines to share their location, they can also manually enter a location to view the weather for that area.

RAZORPAY CLONE | Github | Demo

TAILWIND CSS

- The Razorpay clone project created using Tailwind CSS is a web application designed to replicate the payment gateway system of Razorpay.
- This project was created using only the front-end technologies HTML and Tailwind CSS.
- The application is designed to be visually appealing and easy to navigate for users.

CODESYNC | Github

REACT, NODE.JS, EXPRESS.JS

- CodeSync is a web application that serves as a simplified clone of the CodePen editor. It provides users with the ability to write and preview HTML, CSS, and JavaScript code in real-time.
- The project features user authentication, including login and signup functionality. The application is built using the React library for the frontend, Nodejs, Express for the backend, and MongoDB as the database.

ACTIVITIES AND ACHIEVEMENTS

- 4 star at HackerRank problem solving
- Actively participate in hackathons and coding competitions to enhance problem-solving and programming skills.
- Achieved the second-highest academic standing in the first year of college
- Achieved the third prize in the college drama competition
