EDUCATION

Thiruvalluvar University

Cheyyar

Bachelor Of Computer Applications (BCA)

Graduation Date: Jul 2022

SKILLS & INTERESTS

Skills: Html | Css | Js | React Js | Python | Django | Sql | PostgreSql | AWS(Basic) | Appium | Selenium | Git | Github

Interests: Web development | AI - ML |

CERTIFICATIONS

Certificate in Python in Besant Technologies

Barclay's LifeSkill Programme in GTT, Certificate in Django Framework Basic to Advance in Guvi

WORK EXPERIENCE

AIML(OpenDataFabric)

Bangalore

Software Developer Dec 2022 - Aug 2023

• Conducted comprehensive testing of software systems using Python, resulting in increase in testing efficiency and a

- Collaborated with front-end developers to enhance website functionality by integrating AWS services, improvement
- in website performance, and user experience.
- Developed and Analyzed manual data extraction and increased data analysis efficiently.

Freelancing – Buy Supply

Chennai

Python Developer

Jul 2022 - Nov 2022

- Spearheaded a process re-engineering endeavor that aimed to enhance and streamline end-to-end service processes.
- Completed loggers into the existing codebase, resulting in improved error tracking and debugging process, reducing troubleshooting time.
- Designed a user-friendly UI using the Streamlit library, resulting in an enhanced user experience.

PROJECT EXPERIENCE

Self Learning Vandavasi

Live News Application

- Developed and launched a dynamic live news web application using ReactJS and other cutting-edge web technologies.
- Implemented advanced data caching techniques, reducing loading times and improving overall performance of the application.
- Implemented responsive design principles to optimize the web application for mobile devices too.

Self Learning Vandavasi

Ecommerce - Application

- Developed a feature-rich e-commerce website using Python and Django framework, incorporating end-to-end functionality from user authentication to order processing.
- Integrated authorization checks to ensure that users have appropriate permissions, enhancing the overall security posture of the e-commerce platform.
- Utilized Django's ORM (Object-Relational Mapping) to interact with the SQLite database, ensuring efficient data retrieval and manipulation.

Self Learning Vandavasi

Mobile application testing

- Automated testing of buttons in calculators using Xpath and ID with Appium Inspector, ensuring accuracy and reducing manual testing time.
- Executed a comprehensive mobile application testing project in Appium, resulting in the identification and resolution of software bugs before product release.
- A streamlined process for Appium mobile application testing, utilizing innovative techniques to increase efficiency and reduce the overall project timeline by two weeks.
