Certifications | Internships

Geekster | Geekster Coding Bootcamp
- Worked on various projects like **To-Do-List , E-Commerce Projects**
- Technical Stack Learned **: HTML**, **CSS**, **Tailwind CSS ,Bootstrap, JavaScript** , **React JS , Core Java**

Projects

To-Do-List in React JS [https://lipsa760.github.io/TO-DO/]
- This is a React JS-based project .Todo List app with update, delete, and filter functionality, providing users with an organized task management system.
- Implemented components such as Todo Form and Todo List, enabling seamless task addition, modification, and deletion. Integrated filtering feature to efficiently search and display specific tasks based on user-defined criteria.
- **Tech stack used :** React JS

Movie search [https://lipsa760.github.io/MCT2/]
- This Movie Search App is a web application created with JavaScript and styled using Tailwind CSS.
- It enables users to search for movies by entering keywords. The app fetches data from a movie database API and displays relevant information such as movie titles, posters, and details.
- The user-friendly interface, powered by Tailwind CSS, ensures a visually appealing and responsive design for an enjoyable movie search experience.
- **Tech stack used :** JavaScript , Tailwind CSS

Skills

- **Computer Language** : HTML , CSS , JavaScript , Core Java
- **Frameworks & Libraries** : Bootstrap , React JS , Tailwind CSS
- **Additional Courses** : OOPs
- **Tools & Technologies** : VS code , Github

Work Experience
