SUMMARY:

Full-stack web developer skilled in creating responsive, dynamic applications using modern technologies. Passionate about problem-solving and continuously learning to stay current with industry trends.

TECHNICAL SKILLS:

- **Languages** - javascript and typescript
- **frontend** - HTML, CSS, Tailwind CSS and React js
- **Backend & Database** - Express js, node js, NoSQL (Mongodb), SQL(Postgresql), Prisma ORM
- **Data Structures and Algorithms (DSA) -** C++

PROJECTS :

Paytm Web App: [link](#)

- Built using React.js and Tailwind CSS for a responsive and dynamic user interface.
- Utilizes the MERN stack (MongoDB, Express.js, React.js, and Node.js) for a robust and scalable backend.
- Secure sign-up process with input validation and prevention of duplicate email registrations.
- Dashboard and money transfer pages are accessible only to logged-in users.
- Allows registered users to securely send money to others on the platform.

Blog Website :

- Utilized PostgreSQL with Prisma ORM for efficient, type-safe database interactions, ensuring data integrity and ease of querying.
- Built with Hono for a fast, lightweight backend and Deployed on Cloudflare
- Users can post new blogs, edit their existing content, and view published blogs on this website.
