- Hindi
- English

ANUBHAV

A highly innovative, and enthusiastic individual wtih positive mindset.
Ability to establish priorities and tackle challenges head-on
Keen to find a challenging position in an ambitious company where i will be able to continue to increase my skills.

Personal projects:

○ **HOUSE PRICE PREDICTION USING MACHINE LEARNING**
To forecast house prices one person usually tries to locate similar properties in his or her neighborhood and based on collected data that person will try to predict the house price. All these indicate that house price prediction is an emerging research area of regression that requires the knowledge of machine learning.

○ **FLIGHT FARE PREDICTION SYSTEM**

The project is aimed at developing a Machine Learning based model using linear regression ,decision tree, xgboost , k nearest neighbors and check the accuracy which model best suits and provide the most accurate results.

○ **Design a Drum-kit web app using JavaScript**

The project creates a drum kit where each key on the keyboard corresponds to a specific drum sound.The project is easily customizable. You can add more drum sounds by including additional audio elements and corresponding key bindings in the HTML, and you can modify the CSS to change the visual appearance of the drum keys.

Skills:

- Problem Solving
- C++
- SQL
- HTML
- Operating System
- Data Structure and Algorithm
- OOPS
- DBMS
- Javascript
- CSS
