EDUCATION

Bachelor of Engineering (CSE)
Chandigarh University

2017 - 2021   *Chandigarh, India*

Projects
- Network Enterprises configuration -The project is based on the concepts of networking. It includes configuring different network devices like Router, Switch, Bridge & connecting it with Hubs & PCs by using different types of connecting wires by allocating the IP Addresses to all the interfaces after the sub netting of network id .
- WIFI based Home Automation system- To design smart home the different devices are used for home security, safety and home environment prosperity. Automation is popular because it provides ease, efficiency and secure environment. In this paper all smart appliance is registered to home gateway and controlled by legitimate person.

SKILLS

C++ Python Java SQL JavaScript

HTML CSS

PERSONAL PROJECTS

Gaming Zone Management System
- Gaming Zone Management System is a complete package developed for management of gaming. We developed this system for game lovers. This system shows users available all games list. Users need to be register themselves as temporary/ guest user(one day account) or Permanent account (valid till admin not delete it) and after successful registration.

Face Recognition System
- The goal is of identifying an already detected object as a known or unknown face. Often the problem of face recognition is confused with the problem of face detection Face Recognition on the other hand is to decide if the "face" is someone known, or unknown, using for this purpose a database of faces in order to validate this input face.
