PROJECTS

Library Management System

It was mainly a mini project in which we built a interface so that we can easily publish or record the number of books available in a library.Whether the particular book is available or not by checking into publishing books record.The complete project was done in c language

Slotify

It was a mini project done in 6th sem it was mainly a clone interface of playing the songs recording the songs.Having multiple options to search and create our own playlist of our favourite artists.The Complete project was done in php script with xamp server running in back by storing the databases.

Skin Abnormal Distortion

A Major Project Done by my Team in Final Sem.

Melanoma is a form of skin cancer that develops in melanocytes, a particular type of skin cell. The melanin that gives skin its colour is produced by melanocytes, which are found at the base of the epidermis. The skin darkens or tans as a result of melanocytes

producing more melanin when exposed to UV radiation. Diagnostic imaging assessment is crucial in the identification of anomalies in numerous parts of the body, including skin, breast, brain, lung, and stomach cancers.

Certification:

Internship Completion Certificate At Service Based Company "**LTIMINDTREE**" in final year of College.The Duration Of Internship:**3 Months**
