🏢 Academic Main Projects

Hospital Management System: This project has been conducted as a major project for the final year in MCA. This was a project done with an actual online hospital management system. In this project, the main focus was to remove the difficulty faced when there is a search for a patient's previous record. It manages all the information about the hospital, Patient Management, Medicine Inventory Management, Billing and Payments, Staff Management, and Online Appointment Scheduling which can save time for both patients and hospital staff and provide Security for protective sensitive patients Information.

Utilized hospital systems to monitor and report on individual patient care, including lab results, allergies, and vital signs.

- **Technology used:** JAVA, J2EE, MYSQL, HTML, CSS.

Quiz Management System: This project has been conducted as a mini-project. This project was a model similar to the actual online quiz system whichtakes place. It provides a common platform to connect students and teachers online. The registered teacher can create Quizand the student can give the quiz and can access himself/herself. It has multiple features like, User Registration, Teacher Dashboard, Student Dashboard, Quiz Creation, Quiz taking and Score Calculation and the last one is Performance Analysis.

- **Technology used:** JAVA, MYSQL, HTML, CSS.
