iOS Application Developer

Company	:	Networks Components Pvt. Ltd, Pune
Designation	:	**iOS Application Developer**
Duration	:	Feb 2022 to Till date
Location	:	Pune

Project 1: Clouzer Edge App
Role: Application Developer

Description:-

.   IOT-based Home automation application Worked as an iOS application developer to build a device controlling iOS iPhone and iPad application. With Clouzer being a centralized hub controlling the devices, we integrated the server API into a mobile application called Clouzer. The communication with the hub is done through socket.io and HTTP protocol to integrate different devices Lights, Shades, Thermostats, Music and
Sensors.

Roles and Responsibilities:

- Understand daily requirements.
- Designed the database to store the data from the application.
- UI screen Designing
- Functionality development and component ownership.
- Use the version control tool Git and code storage tool GitHub for added application functionality.
- API Integrations
- Worked on SQLite platform implementing CRUD operations.
- Collaboration in technical discussions.
- Translated basic design plans into full iOS app frameworks, delegating project components to appropriate team members.

Project 2: Chat Application
Role: Application Developer

Description: We are developing a chat application that consists of one-to-one conversation, group conversation, adding an event, assigning a task, and adding an attachment. Developed a messaging application using Socket.io / MQTT for real-time communication and HTTP requests to download and upload the file on the server.

Roles & Responsibilities
- API Integrations
- Conducting thorough testing and debugging of applications
- Functionality development
- Troubleshooting and resolving technical issues
- UI Screen Design.
