## PROJECTS

**Hotel Booking website** (2022)

Developed a PHP website which booked hotel rooms and it generates bill of customer.

- Languages: HTML, CSS, JavaScript, PHP ,Bootstrap
- Database: MY SQL

• Developed a Python-based E-commerce web application end-to-end, using Django in the backend **HTML /CSS / JavaScript** in the frontend ; improved site speed by 30% and reduced shopping cart abandonment rate by 25%

• Implemented a robust e-commerce platform, incorporating over 60 products across 10-15 categories, complete with a seamless wishlist and secure payment system.

**Ticket Booking website** (2023)

- Languages: Asp.net
- Database: SQL server

• This is a web-based project and allows the users to log in to the web page. After logging in, the users can add, edit or even delete the appointment movie. The feature of SMS sending should be a must in this project to remind the user Of an upcoming appointment with its date and time. In order to make this more complete and advanced, authentication while logging in should be added to make it more secure.

**Shopping website (like Myntra)(2023)**

- Front end: Asp.net
- Back end: SQL server

• Developed A shopping Website Template Built Using HTML CSS Responsive Design. Control From Navigation bar. designed specifically to promote or sell products or persuade visitors to convert to a products or persuade visitors to convert to a product related offer.
