❖ Mern Stack (Learning apna college)

Project

❖ **Search Rooms & Hotels**

- - Developed a web application for searching and booking rooms in hotels
- - Implemented features to add hotels, write reviews, and manage listings
- - Utilized front-end technologies like HTML, CSS, Bootstrap, Express.js for the user interface
- - Leveraged back-end technologies such as Node.js and JavaScript for seamless functionality
- - Integrated MongoDB as the database to store and retrieve data efficiently
- – Deployed the application on Render at [https://first_project-wonderlust-6fdj.onrender.com/listings]

Objective

A hardworking individual looking for a challenging position where I can showcase my skills and contribute growth of individual

Strength

I am dedicated to do new skill due to my will power and my patience. This make me different from other

Hobbies

Traveling ,Internet Suffering , and free time I would like to Play with Dog
