PROJECTS

- **BTECHIAN - A platform aimed to support students preparing for placements (jul 2023 - aug 2023)** :
  - Developed a web application that enables Btech students to access interview experiences and preparation tips for placements. It also provides the functionality for students to connect with their seniors by sending connection requests, and it facilitates the tracking of students' grades.
  - Developed Using **Express React and NodeJs**.
  - It is a responsive Full Stack Project having Features such as sending requests, login page, sharing details, posting experiences.

- **SAMADHAN- The Easiest Way To Overcome Depression (jun 2021 - aug 2021)** :
  - * Initiated a startup concept and created a platform aimed at assisting marginalized segments of society by offering them narratives of individuals who have effectively battled and triumphed over depression.
  - * The platform has three main sections: **Experiences** (providing advice based on similar situations), **Support** (connecting users with therapists), and **Feed** (offering positive content for engagement and spreading positivity).
  - * Upon using our services, a feedback portal will prompt users to rate their satisfaction on a 1 to 5 scale and share suggestions for improvement.

- **Sales Insights - (feb 2023 - march 2023)**:
  - * Handled and filtered the database of a sales company.
  - * Brought out the loopholes by data filtering in **MySQL**.
  - * Provided visual representation of the data using **Tableau** and suggested corrective measures to overcome the losses based on the visual representations .
