## PROJECT DETAILS:

### Project#1:

**Title:** Sentiment Analysis Of Text and Emotions Using Machine Learining.
**Role:** Team Member.
**Description:**

Sentiment analysis is used to analyse raw text to drive objective quantitiative results using natural language processing, machine learning, and other data analytics techniques. It is used to detect positive, negative or neutral sentiment in text, and often businesses use it to gauge branded reputation among their customers. It promotes digital marketing and is a source of advertising their brand deeply to customers.

### Project#2:

**Title:** Contact Book Management Using Python.
**Description:**

Contact Book is an python based project used for storing information about some person like name and contact number. In this project we have some functionality like add, edit, delete and view contacts. We use dictionary data type to store the persons data.
