SKILLS

Corejava
Springboot
HTML
CSS
MySQL
Angular
Numpy
pandas
Seaborn
Matplotlib

ABOUT ME

I am an enthusiatic Full stack developer who developed high passion and interest for coding and web applications. My goal is to create visually appealing, user-friendly, and highly functional web applications. With a strong background in HTML, CSS, and JavaScript, I have the expertise to transform design mockups and wireframes into interactive and responsive websites. I am proficient in front-end frameworks such as React and Angular, allowing me to build dynamic and efficient user interfaces.

PROJECTS

ONLINE SHOPPING SYSTEM

The main objective of this project is to develop a web orientation application which can provide an online Shopping feature to the user.
Technical requriments:
