DESCRIPTION

I desire a challenging and expanding employment opportunity in your esteemed organization for better advancement in my career and to serve your company at the best of my ability.
Skilled in Programming & Scripting Languages...
Always eager to adapt and take on new challenges!

PASSION

Drawing & Travelling. (My Dearest Passion.)

Playing | **Music** | **GYM**

LANGUAGES

ENGLISH | TELUGU | HINDI | MARATHI

TRAINING

Specialized Training From MZOS
July 2022 | Java-STP Training Completed...

WORKSHOP

Android Mobile Applications
Jan 2016 | Solapur

Network Technologies
Aug 2015 | Solapur

Hardware And Networking
Jan 2015 | Solapur

OTHER SKILLS

Microsoft Office | MS-Word | MS-Excel | MS-PowerPoint

Civil Engineering Software
Auto-CAD, Autodesk Revit & SketchUp (Familiar)

PROGRAMMING LANGUAGES

JAVA

MySQL

Python

C++

C Program

SCRIPTING SKILLS

- HTML
- CSS
- JavaScript

EDUCATION

B.Tech.
Dr. Babasaheb Technological University, Lonere
Aug 2018 – Jun 2022 | Solapur, India
A.G.Patil Institute Of Technology, Solapur
CGPA 8.47 | Civil Engineering

Diploma
Maharashtra State Board Technical Education
Aug 2013 – Mar 2016 | Solapur, India
A.G.Patil Polytechnic Institute, Solapur
69.50 % Specialized In Computer Engineering

SSC
Pune Board
Mar 2013 | Solapur, India
V.G.M. Prashala, Solapur
60.36 % (First Class)

ACADEMIC PROJECT

DIPLOMA
"Detection And Isolation Of Malicious Node In MANET"

This is specially developed for the Defence System. Defense System is backbone of a country's security. Our project focuses on making the Line Of Control (LOCs) of any country more resistant to penetration and intrusion. It strengthen the immune power of that country's defense system.
Here, we are configuring a wireless sensor network. If this n/w is established on the LOCs, if someone i.e. more likely an intruder tries to enter our land then the sensors will detect him and an alerting signal will be sent to the person observing the n/w of those sensors. But in some circumstances, it is also possible that the intruding country may place their unauthorized node into our sensor's n/w with an intension of harming our network. Is such cases we'll detect the intruding node and eliminate it.
