PROJECTS

Bringmark Website

* The Bringmark website has been optimized so fast that it takes only 2 seconds to open and has used Redux tool kit for integration.
* NodeJS and React JS have multiple integrations in Bringmark.
  I have used multiple particle JS in Bringmark website
* Bringmark website has been made fully responsive so that it is comfortable for every mobile, tablet and large screen.

Bringmark CRM

* Bringmark CRM has the business requirements of every client and the price of all the projects and the amount of work done is implemented.
* Which employee is working on the projects and when is the next meeting with the clients and how much work is left for the client and what are the changes of the clients, all this has been implemented.

Bringmark HRMS

* Bringmark HRMS is built in ReactJS and NodeJS
* Payment integration is used in Bringmark HRMS and manages all employment like employee salary, attendance and employee leaves.
* Detailed explanation of project modules, design details like dfd, context diagram are provided in CRM.
* Recruit module must contain test details form, short listed form, resume upload form.

Sudo24 website

* A client for creating and updating blog entries
* I have created Sudo 24 website from scratch using react js and mui..
* Authentication is used in this website through which teachers, students and admin panels have access.
* Teacher can upload courses in Sudo 24 website, student can buy courses and control the website from admin panel.

EDUCATION

MAHARSHI DAYANAND UNIVERSITY
world college of technology and management
05/2019 - 05/2023,   *b.tech in computer science engineering*

BOARD TECHNICAL EDUCATION
chhotu ram rular institute of technology
07/2017 - 07/2020,   *diploma in engineering*

CENTRAL BOARD OF SECONDARY SCHOOL
govt.coed senior secondary school
07/2015 - 07/2016,   *10th*

SKILLS

HTML Css JavaScript React
Redux ToolKit mongodb
Nodejs Bootstrap Python
Machine Lerning
MySql Dsa Express js

WORK EXPERIENCE
Bringmark PVT.LTD
(03/2021- Present)

* I have implemented this website from scratch using React and Mui.
* This website has been designed in 3D for user attraction.
* Cloudnary has been used in this website which has been implemented to make the website fast.
* At Bringmark, I created a customer management system in which the software managed the clients.
* Bringmark's CRM is built in ReactJS and NodeJS
* I created the Human'Resource Management System at Bringmark
* AI had done payment gateway integration in HRMS and role wise authentication is done like Admin, Employee and Customer.
* Developed a voucher management system using MERN stack working in Team of two group
* worked with closely with clients to establish specification and system design
  stored retrieved and manipulated data for close analysis of database performance

Sudo 24 website, I have also used Nodejs so that the teacher's courses are available from our backend.

Sudo24 App

- Sudo 24 app is built on React Native and its stable latest version is 0.72
- Sudo 24 app also has roles of teacher and student in which the student will buy the course and the teacher will upload the course.
- Wallet option is kept in the teacher panel which is being controlled from the admin panel so that the student and course and the teacher will upload the course.
- There is a wallet option in the teacher panel which is being controlled from the admin panel.
- Blog and reels have also been created in Sudo 24 app.

Sudo24 Hrms

- Sudo 24 hrms is built from scratch using react js and ant design.
- Sudo24 Every employee can set attendance in hrms. In this I created the backend on nodejs and frontend on react.
- In Sudo24 HRMS, every employee first adds the account and then after one month the salary is transferred through open bank integration. This process has been implemented.
- Sudo24 also submits every employee's daily work report in hrms. Process has been implemented and CMS has also been implemented.

Sudo24 Admin Pannel

- Sudo24 has also implemented daily blog updates in the admin panel so that the website And users keep doing it continuously on the app.
- Also implemented sudo24 admin panel plan update which allows teacher courses and student course price updates
- sudo24 adminpanel all teacher and student data is shown delete and update tab live time data is implemented and teacher and student how many times payment is made is also implemented
- Sudo24 AdminPanel has implemented all teacher and student wallet control management in which admin can update teacher and student wallet money and send wallet money to multiple users simultaneously.
- Add, update, delete teacher courses are also implemented on sudo24 admin panel.
- Add, update, delete teacher c

World Food Tour

- There will be a filtering range feature where users can filter according to the prize or budget
- User can select the food and buy and user can also select the add to cart
- Where admin can log in to their account and create, delete an item, and process to the shipping address.
- User can also pay through this website with help of payment gateway
- this project there is a order page with status of order for costumer and a separate page of both costumer and merchant.

- I have implemented this sudo 24 website,app,hrms and admin pannel
- I used to lead the team and had two junior software engineers under me.
- Here I used to manage the mongodb database in which I used to analyze and fix the data of teachers and students.
- This is where I used to do Continuous Integration when I had to do a live project.
- Gained hands-on expertise in Bootstrap, Foundation, Express and similar back-end Node.js as well as front-end presentation frameworks web application frameworks
- collaborated with project management to design, build and test system
- Designed intuitive graphical user interfaces to improve user experience
- Simultaneously created & maintained scheduled jobs in SQL Server for space maintenance and daily backups of
- system and user databases for 10 clients
- Developed a machine learning algorithm to predict the probability of fraudulent transactions in real-time
- Created an automated system that monitored and analyzed data from multiple sources, including social media
- User can select the food and buy and user can also select the add to cart
- Participate in conception, design, development, implementation and deployment of web-based user interface systems
- Direct involvement in elements of design, development and maintenance of website Create cross-browser, fully functional web pages using HTML and CSS while strictly adhering to accessibility and W3C web standards
- Leading the design of the team's intranet site and then building it out with guidance from the Innovation team
- Assisting in the HTML coding and development for websites and social media Be able to take critiques for design and development
