🪪 PROFILE

I am seeking a challenging position where I can leverage my skills to contribute to innovative and impactful projects while continuing to grow as a professional in the IT field. Open to new learning opportunities and excited to contribute to a forward-thinking organization, I am confident in my ability to make a positive and meaningful impact.

💼 PROFESSIONAL EXPERIENCE

Web Development intern   01/2023 – 04/2023
S.M.SONI INFOSOFT   Vadodara, India

- I built web pages using Bootstrap for responsive designs.
- I learned HTML, CSS, and Javascript basics.
- Learned basic debugging skills and also worked on SQL queries.

Android Development intern   06/2022 – 07/2022
BrainyBeam Technologies Pvt. Ltd. June 2022 - July 2022, Ahmedabad   Ahmedabad, India

- I learned Android Studio: The official integrated development environment (IDE) for Android app development. It provides tools for designing, coding, testing, and debugging Android applications.
- XML: Extensible Markup Language is used for designing layouts in Android. UI elements are defined in XML files, which are then linked to the application code.
- Activity: In Android, an activity represents a single screen with a user interface. It is a fundamental building block for Android applications.
- Manifest file: The AndroidManifest.xml file contains essential information about the Android app, including package name, permissions, and components like activities and services.

🎓 EDUCATION

Bachelor of Engineering in Computer   06/2023
KJ Institute of Engineering and Technology   VADODAR, India

- completed bachelor's degree with a prominent score of 7.78 out of 10, Including subjects like Computer programming, Computer network, Software engineering, Artificial intelligence, Android development, Data structure, etc.

Science   Vadodara, India
Grukul vidhylay

PROJECTS

Customer Relationship Management (CRM)

- PHP: As the primary programming language for the project.
- CRM System: Mention that you worked on a CRM project, specifying if it's custom-built or based on a particular CRM platform.
- Database Management: Emphasize your ability to work with databases, especially if you used MySQL or another relational database management system (RDBMS).
- Front-end Development: Highlight your expertise in building the user interface using HTML, CSS, and possibly JavaScript.
- Back-end Development: Mention your skills in developing the server-side logic using PHP.
- User Authentication and Authorization: If you implemented user authentication and access control features.
- Security Measures: Mention any security features you implemented to protect customer data and ensure the integrity of the CRM system.
- Testing: Highlight any testing methodologies you employed, such as unit testing or integration testing, to ensure the reliability of the CRM system.
- Project Management: If you were involved in managing aspects of the project, such as timelines, tasks, or collaborating with a team.
- Collaboration: Emphasize your ability to collaborate with cross-functional teams, such as designers, testers, and other developers.
- Problem Solving: Highlight your problem-solving skills, especially if you encountered and resolved challenges during the development process.
- Customer Support: If applicable, mention any involvement in providing support to end-users or addressing customer issues related to the CRM system.
