## PERSONAL INFORMATION

**Nationality:** Indian

**Date Of Birth:** 12-01-1995

**Blood Group:** O+

**Marital Status:** Unmarried

**Religion:** Hindu

**Hobby:** Internet Surfing, Learn New Technologies, Driving

## SKILLS

MySql, Firebase, iOS Development, Xcode, Git, SVN, Bitbucket, Swift, Objective C, SwiftUI

## LANGUAGES

English, Hindi, Gujarati

## EXPERIENCE & SKILLS

- 5+ Years of Experience in iOS Software Development

- Experienced Software Developer adept in bringing forth expertise in design, installation, testing and maintenance of software systems.

- Able to effectively self-managed during independent projects, as well collaborate as part of a productive team

1) Made iOS app's new setting responsive to different sizes of screen (ipad,iPhone)

2) Separated Localization (different types of Spanish, Portuguese, Chinese). Thereby supporting good translation that increased non-English speaking users by 300% for iOS app.

3) Added Phonebook , Camera, Mic permission alert and instructions for all iOS Users. Responsibilities: Implemented Core Data for persistent storage of user data.

4) Created MVC Development of Delegates for updating model information and created hybrid apps.

5) Created Various views, table views, customized views, and popovers.

6) ReDesigned several screens including default application landing screen as per newer wireframe.

7) Created custom checklists and shared them with selected app users  by calling web services through JSON libraries and connecting to the SQL lite Database with objective C Interfaces.

8) Implemented CoreData Framework to store user data.

9) Integration of applications with Google maps and also various third-party APIs  such as Facebook, Twitter.

10) Used Mapkit and Core Location framework to enhance user find their destination of the nearest local store.

11) Implemented NS Operation Queue and NSURL Connection to integrate with backend web services.

12) Formatted the Data as per Business rules to display in UI.

13) Used the MediaPlayer framework of Cocoa Touch to Stream Video and audio.

14)  Created Pod Libraries (SDKs) and Uploaded on GitHub (Live)
