PROFILE

As a Computer Science student, I aspire to secure my first work experience. I pride myself on being responsible and organized, qualities that I believe will be valuable in a professional environment.

TECHNICAL SKILLS

java

python

full Stack

SQL

CERTIFICATIONS

Python certification By Hackerrank

LEARNINGS

I possess expertise in software development life cycle and web technologies such as HTML, CSS, and JavaScript.

📍 4-104, Pedayadara, Machilipatnam, Andhra pradesh.

DURGA BHAVANI GUNDU

Intern

EDUCATION

SRI VASAVI INSTITUTE OF ENGINEERING AND TECHNOLOGY
Computer Science And Engineering
2019 - 2023

INTERNSHIP

Software Development Intern at Kode nest
I have acquired practical skills in java and web technologies from the industry professionals.

PROJECT

A Comparative study on Fake job Post prediction: -

This study focuses on predicting fake job posts using deep learning techniques. Text data preprocessing involves removing stop words, punctuation, and numerical values, along with stemming. The TF-IDF method assigns term weights based on document frequency. Performance is evaluated using accuracy, recall, precision, and F1 score metrics to enhance classification accuracy.

Languages: - Python, Java
Natural Language Processing (NLP): - Stemming, stopword Removal, TF-IDF
Python Libraries: - NumPy, Pandas, Matplotlib, Seaborn.
