- Playing Cricket, Kabaddi and Listening Music

🧠 Skills

Front End
HTML, CSS, Bootstrap, JavaScript, Reactjs

Back End
Node Js,

Database
MongoDB, MySQL

Tools
Visual Studio Code

📁 Projects

Meal Booking Project
At Rishabh Software
The Meal Booking System is a web-based application that simplifies meal booking management within an organization. It offers secure login, user registration, and an intuitive calendar page. The system is divided into employee and non-employee booking sections, with features for date selection, custom categories, and settings. It also features a logout feature for security. In that project I had used react js and node js and mongoDB Compass.

Art Gallery Management System
At BrainyBeam Technologies Pvt. Ltd.
The Art Gallery Management System is a web-based platform designed to streamline and enhance the management and presentation of artworks in art galleries. It includes features like artwork cataloging, inventory management, and user authentication. The system also offers search and filtering functionalities, content management, e-commerce capabilities, secure payment gateways, and analytics tools for visitor engagement and popular artworks. It enhances the overall online experience for both administrators and art enthusiasts. In that project I had used HTML, CSS, JavaScript and php.

✏ Declaration
